

TOSS Interaction Flow Diagram

- **Use Case:** Mini dashboard on bottom of home screen
- **Primary Actor:** Primarily regular users, but all visitors have access (except for interacting with and participating in a new Toss).
- **Scope:** tosses Collection in MongoDB
- **Flow:** View top 3 most populated Toss's for a particular day. On dashboard, all show Prompt and number of participants. In addition, upon click, Phase 2 shows current tag distribution Phase 3 shows final tag rankings. Users may interact with any of these responses. At 5pm everyday, the currentPhase of all Toss's ≥ 0 & ≤ 3 get incremented.

- **Use Case:** Participate in New Toss Disc/Game
- **Primary Actor:** Regular users
- **Scope:** responses Collection in MongoDB
- **Flow:** Participate in a Phase 1 Toss, receive prompt, do research, find source, submit source and comment. At 5pm next day Toss's currentPhase increments. Phase 2 opens. At 5pm next day Toss's currentPhase increments. Phase 2 opens. Users who participated in Phase 1 now rate other responses. 5pm next day, results are tallied and rankings based on category of tag, are returned. Users use this interactive ranking system to comment on other responses and see an individual breakdown of that response.
